Subject index

A

Acetate transport 68
Acetylcholin induced contraction 558
Acetylcholine 200, 385, 589
Acetylcholine receptor 11
– – -channels 113
– – -ion channels 249
Acidosis 200
Acivicin 551
Action potential 584
Activator cations, external 99
Adenosine 443
– analog 145
– triphosphatase 423
– triphosphate 622
Adenylate cyclase 222
Adipocytes 564
α-Adrenergic activation 102
AlF_4^- 423
Aldose reductase 346
Aldosterone 706
Alkali metal ions 564
Alkalosis 200
Aluminium 423
Alveolar epithelium 340
Amiloride 68, 193, 200, 208, 216, 457, 509, 651
– -blockable Na^+ channel 369
Amino acids 543
4-Aminopyridine 171
AMP 443
Amphotericin B 509
AMPPCP 443
AMPPNP 443
Analysis 437
Anion channel 304
– channels 185
Antidiuretic hormone 464
Antidromic spike 235
Antisecretory agent 331
Aorta 579
Apamin 171
Arachidonic acid 145
– – metabolites 102
Arterial oxygen concentration 82
Arteriolar resistance 571
Arterioles 324
ATP 257, 297, 622
– pyrophosphohydrolase 443
ATPase 125, 629
ATP-sensitive K^+ channel 669
– potassium channel 622
Atrial cells 492
– myocyte 102
– natriuretic factor (ANF) 11
Atropine 235, 249, 558
Autoradiography 11
AVT Oxytocin 59

B

Ba current 534
Ba^{2+} 185
Baclofen 139
Barium current block 690
Baro-receptor denervation 495
Basolateral membrane 185, 469
Bay-K-8644 257
Bicarbonate, saliva 200
Bicarbonate/chloride exchange inhibitor (DNDS) 651
Bladder epithelium 208
Blood flow 450
– gases 324
– pressure 719
– -free perfusion 228
Bradykinin 377
Brain cortex 228
Brattleboro rat 464
Brown adipocytes 564
Bumetanide 216, 651, 713

C

Ca channel 534
– channels 401
Cable analysis 457
$(Ca^{2+} + Mg^{2+})$-ATPase 423
Ca^{2+} 134, 162
Ca^{2+} activation 118
Ca^{2+} channel agonist 257
Ca^{2+} channels 1
Ca^{2+} currents 360
Ca^{2+} depletion 134
Ca^{2+} ionophore A23187 171, 304
Ca^{2+} reabsorption 640
Ca^{2+} release 15, 15
Ca^{2+} transport 640
Ca^{2+}, Mg^{2+}-ATPase 377
Ca^{2+}-induced Ca^{2+} release 15
Ca^{2+}-sequestering system 629
Ca^{2+}-transport ATPase 629
Ca^{2+}-uptake 629
Ca_i 351
Ca-channel 150
– current 145
Caffeine 235
Calcium 44, 437
– channel 31, 125
– – current 477
– – state transitions 690
– channels 92, 257
– conductance 410
– current inactivation 1
– currents 89
– influx 1
– ionophore 193
– ions 430
– release 377
– -activated potassium channel 118
– – channels 416
– -dependent potassium channel 171
Calmidazolium 351
Calmodulin 44, 134
– antagonist 282
– radioimmunoassay 484
– -binding peptide 282
cAMP 193, 340, 351, 701
– stimulation 340
Carbon dioxide 495
Cardiac fibroblasts 95
– hypertrophy 311
– myocytes 669
– Purkinje cells 52, 99
Cardioballs 52, 99
Carotid chemoreceptors 523
– sinus nerve 523
Cation channels 185
– permeability 564
^{45}Ca fluxes 377, 579
^{45}Ca uptake 579
Cell coupling 351
– culture 11
– membrane 265
Cells 401
Central nervous system 600
Cerebellar Purkinje cells 92
Cevadine 157
Channel blockade 416
– blockage 622
– lifetime 613
– (LTCC) 31
Channels 423
Chemoreception 523
Chemo-receptor denervation 495
Chemoreceptor input 523
Chloramine-T 273
Chloride activity 663
– channel 369
– currents 265
– microelectrode 663
– secretion 291, 297
– transport 713
2-Chloroadenosine 145
Chromaffin cell 11, 589
Chronic stimulation 629
Cisplatin nephrotoxicity 647
Cl secretion 193
Cl/HCO_3 exchange 701
Cl^- channel 185
Cl^- conductance 457
Cl^- transport 640
Cl^-/HCO_3^- exchange 469
Cl^-/HCO_3^- exchange 651
Cl-secretion 216
$(4Cl\text{-}D\text{-}Phe^6Leu^{17})VIP$ 222
Collecting duct 346
– – cells 178
Colon 216, 706
Conductance changes 469
ω-conotoxin GVIA 150
Contractile activation 430
– inactivation 373
– properties 24, 629
Contraction 37
– velocity 73
Control of respiration 523
Corneal epithelium 713
Cromakalim 669
Cross-bridge energetics 73
– strain 245
Cs^+ 171
Cultured human sweat duct cells 369
– myotubes 410
– sympathetic ganglion cells 105
Current fluctuation analysis 249
Cyclic AMP 162, 304
Cyclooxygenase pathway 193
Cypermethrin 44
Cystic fibrosis airway cell 291, 297
Cytosolic free calcium 125

D

D600-induced paralysis 373
Depolarization 235, 579
Development 354
Dibutyryl cyclic AMP 351
– -cAMP 340
DIDS 200
Diffraction intensity 676
Dihydropyridine 534
Dihydropyridines 150, 477
1,4-Dihydropyridine action 690
– Sandoz 202 791 690
Diltiazem 579
Distal convoluted tubule 457, 500
Diuretics 713
DOCA 59
Duodenal brush border membrane 701

E

Ear artery 423
Ecto 5′-nucleotidase 443
EGTA 304
Electrical field stimulation 216
– potential profile 393
Electrogenic Na transport 706
– transport 543
Electrolyte transport, renal 640
Electron microprobe 640, 647
– – analysis 208
Embryonic peripheral neurons 360
Endoplasmic reticulum 423
Endothelial cells 377
Endothelium-derived relaxing factor (EDRF) 377
Energy intake 317
Environmental temperature 317
Enzyme immunoassay 464
Epidermal growth factor 118
Epithelial cells 118, 369
Epithelium 59
Essential tremor 31
Excitability of slow fibres 584
Excitation contraction coupling 15, 410
– -concentration coupling 24
– -secretion coupling 377
Excitatory synapse 437
Exocrine glands 193

F

Fast e.p.s.c. 249
– -twitch muscle 629
Fenvalerate 613
Fibroblasts 95
Fluorescent dyes 600
Fluorine 423
Force inactivation 373
Forskolin 162, 579, 713
Frog skin epithelium 59
– – glands 193
Fura-2 125
– loaded smooth-muscle cells 162
Furosemide 286, 464, 713

G

G proteins 492
$GABA_B$-receptor 139
Gallbladder epithelium 331
Gap junction channel conductances 95
– junctions 95
Garden hose effect 82
Gastric motility 558
– mucosa 469
– smooth muscle cells 416
Gastrointestinal muscles 558
Gating 95
– current 516
Glucagon 222, 640
γ-Glutamyltransferase 551
Glutathione 551
Goldman-Hodgkin-Katz theory 564
G-proteins 423
GTP 377, 492
– -binding protein 145

H

Harmaline 31
HCO_3 secretion 331
Heart 82
– cells 690
He-Ne laser 676
HEPES 651
Hexamethonium 235
Hibernation 584
Hippocampal slice 139
H^+ pump 59
Housefly 44
Human colon 706
– stomach 558
5-Hydroxytryptamine (serotonin) 162
Hypercapnia 324
Hypertensive rats 37
Hyperthermic muscles 15
– muscles 24
Hypothermia 228
Hypoxia 82, 324

I

Icecold solutions 579
Ileum 534
Inhibitory neurons 139, 139
Inosine 443
Inositol 1,4,5-trisphosphate 377
Inotropism 311
Inspiratory related neurons 523
Instruments and techniques 589, 597
Insulin secretion 1
– -secreting cells 1
Internal free calcium 89
– Na concentration 52
Interstitial fluid compartment 443
Intestinal smooth muscle 401
Intracellular ATP 257
– chloride activity 663
– free calcium 162
– ion concentrations 647
– K 385
– pH 200, 543
– sorbitol content 178
– voltage 286
Intraventricular NaCl infusion 719
Intravital microscopy 571
Invertebrate 162
Inward rectification 118
– rectifier 492
– rectifier K channel 157
Ion channel 11, 265
Ionic currents 360
Ionophore-based microelectrode 663
Isobutylmethylxanthine 713
Isolated glomeruli 651
– heart 311
– perfused rat kidney 634
– – tubule 286
– smooth muscle 558
– – – cells 477
Isometric tension 73
Isoproterenol 340
Isradipine 477

J

Juxtaglomerular cells 651

K

K channel 622
K channel, inward rectifier 157
K conductance 331
K movement by ^{39}K NMR 385
K-contractures 24
Kidney 634, 640
– cell line (OK) 543
– epithelium 304
Kinetics 589
K^+ channel 118, 185, 291, 457, 492, 669
K^+ channels 340
K^+ conductance 297
K^+ permeability 500
K^+ transport 500, 640

L

Langendorff rat 311
Lanthanum 373, 683
Large intestine 216
Laser diffraction 676
Lens cataracts 346
Lingual artery 523
Lipoxygenase metabolite 102
Loperamide 331
Low threshold calcium 31
L-type Ca^{2+} channels 257

M

Macula densa cells 286
Malignant hyperthermia 15, 24
Mammary epithelial cells 118
Mandibular gland 68
Medullary collecting duct cells 178
Membrane conductance 171, 713
– depolarization 1
– permeability 178
– potential 37, 52, 118, 600
– – oscillation 157
– potentials 331
– vesicles 701
– voltage 457
Mesenteric microvessels 324
α,β-Methylene adenosine 5′-diphosphate (AOPCP) 443
Mg^{2+} reabsorption 640
Mg^{2+} transport 640
Microcirculation 450
Microdialysis method 719
Micro-disc electrophoresis 634
Microdissected cortical collecting tubules 125
– tubular segments 464

Microfluorescence assays 597
Microvessels 324
Miniature endplate potentials (mepps) 683
Miniature e.p.s.c. 249
Motilin 558
MR cell 59
Muscarinic K^+ channel 102
Muscle fibres 113, 245, 430, 676
– membrane 157
– organ culture 584
– transection 113
– -tendon junction 113
Muscular dysgenesis 410
Myelinated nerve fibres 273
Myocardial calcium metabolism 311
Myocytes 95
Myometrial strips 423
Myometrium 477
Myosin 134, 597
– light chain kinase 282
Myotubes 410

N

Na absorption 193
Na pump current 99
Na pump current/voltage relationship 52
Na transport 208, 647
Na-absorption 216
NADH-fluorescence 597
Na^+ block 118
Na^+ channel 369, 457
Na^+ permeability 500
Na^+ transport 59, 500, 509, 640
Na^+-, K^+-ATPase 509
(Na^+,K^+)-ATPase 311
Na^+,K^+-ATPase 317
$Na^+2\ Cl^-K^+$ cotransport 286
Na^+/Ca^{2+} exchangers 125
Na^+-H^+ exchange 200
Na^+-K^+-ATPase 340, 500
Na/K ATPase 393
NaK-2Cl cotransport 469
Neonatal rat atrial cells 492
– – heart cells 690
Nephron of Brattleboro (DI) rats 464
Nephrotoxicity 647
Nerve stump 584
– terminal 683
– -muscle synapses 437
Neuroblastoma cells 613
Neuromuscular junction 44, 437, 683
Neurones 600
Neuropathy 346
Neurotransmitter release 44
Nicotinic acetylcholine receptor 11
– ACh channel 105
– AChR channels 249
Nifedipine 401, 534
Nitroprusside 145
Node of Ranvier 273, 516
Nodose ganglion 171
Noise 437
– analysis 105
Nonmodulated receptor model 690
Non-selective channel 564
Noradrenaline 579
Norepinephrine 423, 719

O

Octanol 31
6-OH dopamine 443
Oil-well method 597
Okadaic acid 134
Opossum kidney cell line (OK) 543
Organic osmolytes 178, 346
Osmolytes 178
Osmoregulation 178, 346
Osmotic equilibration 676
Ouabain 311, 331, 385
– binding 317
– -sensitive cells 208
Oxygen consumption 82
– pressure 228
– supply 228
– uptake 82
Oxyntic cells 469
Oxytocin 464

P

Pancreatic islet B-cells 1
Parasympathetic neurones 235
Paravalbumin 629
Parietal cells 185
Patch clamp 118, 185, 291, 297, 354, 401, 492, 564, 589, 600, 613, 622
– electrode voltage clamp 265
Patch-clamp 11, 92, 150, 304, 369, 416, – analysis 690
Peptides 430
Permeability sequence for ammonium and the alcali metals 564
Pertussis toxin 492
PGE_2 synthesis 464
Phentolamine 235
Phenylephrine 102
Phorbol ester 145
Phosphatase 134
Phosphate 73
Phospholipase A_2 activity 193
Phosphoprotein phosphatase inhibitor 134
Phosphorylation 134, 701
Phrenic nerve 523
Pinacidil 669
^{31}P NMR spectroscopy 200
Porphin manganese(III) chloride 663
Portal vein 37
Postganglionic stimulation 235
Postnatal ages 600
Potassium 437
– channel 171, 622
– – openers 669
– channels 291,297, 360, 416
– secretion 393
– transport 340
P_{O_2} histogram of brain tissue 228
P_{O_2} needle electrodes 228
Precapillary microvessels 450
Preoptic thermosensitive neurons 495
Probenecid 68
Propagated constriction 450
– dilation 450
Prostaglandin E_1 331
– E_2 193, 713
Purkinje cells 92
– fibres 52, 99
Pyrethroid insecticide 44, 613

Q

Quantal release 44, 683
– store of transmitter 437
Quinacrine 193
Quinidine 416

R

Reabsorption 369
Receptor 589
– -operated 423
Renal adenylate cyclase 222
– Na transport 647
– Na^+ and K^+ transport 500
– plasma membranes 222
– proximal tubule 663
– tubular transport 551
Renin release 651
Residual chloride 663
Resistance regulation 571
Respiratory cells 291, 297
– network 523
Resting nerve terminals 683
RP 49356 669
Rubidium 340

S

S3 segment 663
Saline solution 82
Salivary gland 200, 385
– glands 68
Saponin skinning 484
Sarcolemma vesicles 311
Sarcoplasmic reticulum 629
– – Ca^{2+} release 15
– – calcium release 24
Secretagogues 713
Secretin 222
Segmental heterogeneity 706
Sensory neurones 89
– neurons 145, 150
Serotonin 162
Sex dependent proteinuria 634
Sheep Purkinje fibres 99
Short chain fatty acids 68
Short-circuit current 193
Single Ca channel 534
– channel 589
– – analysis 105
– – currents 95
– – recording 257
– -channel conductances 150
Sinus node strips 351
SITS 304
– -insensitive ^{36}Cl uptake 701
Skeletal muscle 15, 24, 73, 157, 317, 571, 622, 629
– – cells 265
– – fibres 113
Skinned muscle 282
– – fibers 15
– – fibres 430
Slow after-hyperpolarization 171
– Ca^{2+} channels 257
– fibres 584
– outward tail current 171
Smooth muscle 37, 134, 282, 401, 484, 534, 558, 579
– – cells 257, 416, 477
Sodium absorbing epithelium 509

X

– channel currents 354
– – inactivation 273
– channels 516, 613
– pump current 52
– transport 706
Somatostatin 492
Sorbitol 178
– metabolism 346
Spinal cord 600
Stomach 558
Streptozotocin 346
Striated muscle fibres 676
Submucosal plexus 216
Sucrose phosphorylase 73
Sweat duct cells 369
Sympathetic ganglion cells 105, 249
Synaptic currents 249
– potentials 235
– vesicles 683

T

Taenia coli 282
TEA 118
Temperature (dependent) 683
Tetani 24
Tetanized muscle fibres 245
Tetrodotoxin 216, 354, 558
– -sensitive sodium channels 360
Thermosensitive neurons 495
Thromboembolic reactions 324
Thyroid 317
– cell monolayer 509
Thyrotropin 509
Tissue culture 265
– P_{O_2} 228
TnI-TnC interaction 430
Toad cruralis muscles 584
Tolbutamide 622
Tracheal smooth muscle 134
Transepithelial ion net fluxes 640
Transmyocardial effluent 443
Transport compartments 208
Tremor 31
Triton X-100 skinning 484
Troponin-I 430
TTX 669
Tubocurarine 171
Tubular segments 464
Tubule superfusion 125
Tubuloglomerular feedback 286
Twitch muscle fibres 373

U

Urinary bladder 208, 393

V

Vascular smooth muscle 484, 579
– – – cells 257
Vasoactive intestinal peptide 222
Vasodilatation, maximal 82
Vasomotion pattern 571
Ventricular heart cells 690
– myocytes 354
Ventrolateral medulla 719
Venules 324
Veratridine 437
Vessel wall injury 324
Voltage clamp 52, 95, 171, 273, 373
Voltage-dependent Ca channels 401
Voltage-independent calcium channel 125
Volume regulatory mechanism 651
